

Conceptual and Logical Design 5 levels 2425

Activity: Submission Link for Assignment 1

Course: Information Systems CMPU4061: 2024-25

Name: Eamonn Kelly

Part A Assumptions	Level 4 2 points	Level 3 1.5 points	Level 2 1 point	Level 1 0.5 points	Level 0 0 points	Criterion Score
Assumptions		✓				1.5 / 2

Part A	Level 4 3 points	Level 3 2.5 points	Level 2 2 points	Level 1 1 point	Level 0 0 points	Criterion Score
Entities Identification		✓				2.5 / 3
Relationships and cardinality			✓			2 / 3

Criterion Feedback

Good set of relationships and cardinality/optionality. A relationship between parking slot and trip is required to store origin and destination of each trip.

Attributes			✓			2 / 3
------------	--	--	---	--	--	-------

Criterion Feedback

Good list of attributes.

Rough ER diagram			✓			2 / 3
------------------	--	--	---	--	--	-------

Criterion Feedback

Good ER diagram based on previous design decisions.

Diagrams	Level 4 4 points	Level 3 3 points	Level 2 2 points	Level 1 1 point	Level 0 0 points	Criterion Score
----------	---------------------	---------------------	---------------------	--------------------	---------------------	--------------------

Diagrams	Level 4 4 points	Level 3 3 points	Level 2 2 points	Level 1 1 point	Level 0 0 points	Criterion Score
Fully Attributed ER Diagram						2 / 4
Criterion Feedback Good diagram based on previous design decisions. Good use of PKs and FKs with FKS missing for Parking slotID pick up and returned.						

Reflection	Level 3 2 points	Level 2 1 point	Level 1 0 points	Criterion Score
Limitations and possible improvements				1 / 2
Criterion Feedback Some good comments on scope of the project, more details on limitations and improvements should be included.				

PART B1	Level 3 1 point	Level 2 0.5 points	Level 1 0 points	Criterion Score
UNF				1 / 1
1NF				1 / 1
Criterion Feedback 1NF correct and process explained in detail.				

PART B2	Level 3 3 points	Level 2 1.5 points	Level 1 0 points	Criterion Score
2NF				1.5 / 3
Criterion Feedback 2NF not fully achieved or no rationale provided. Table Grades-2 should also include the SubjNum, otherwise we cannot know what subject does the grade relate to. A copy of this attribute is copied into the newly created table.				
3NF				1.5 / 3

PART B2	Level 3 3 points	Level 2 1.5 points	Level 1 0 points	Criterion Score
Criterion Feedback Good identification of transitive dependencies. Similarly to the previous point, attributes are moved instead of copied into the newly created tables.				

PART B3	Level 3 2 points	Level 2 1 point	Level 1 0 points	Criterion Score
Normalisation Assumptions				1 / 2
Criterion Feedback Some good assumptions included but more details about some of the dependencies are needed. For example, how does the advisor relate to the course or the student? can a student take the same subject in different years?				

Total	19 / 30
-------	---------

Overall Score

Level 4
Very good submission with a clear understanding of different design processes.

Level 3
Good submission overall. Some issues identified in the feedback.

Level 2 
Basic designs with some issues identified in the feedback.

Level 1
Poor submission, design decisions wrong or not justified.

Level 0
No Submission
